

Shield Insurance

Comprehensive Solutions for a Secure Future

Problem Statement

The business requires a comprehensive analytics dashboard to monitor core metrics including total customers, total revenue, and their daily growth rates, while tracking month-over-month policy changes. The solution must provide customer and revenue segmentation by age group and city, with interactive filters for sales mode, age group, city, month, and policy ID, and the ability to toggle between revenue and customer trend visualizations. Additionally, dedicated analysis pages are needed for sales mode (showing customer/revenue splits and monthly trends) and age group (analyzing impact on expected settlement, sales mode preference, and policy preference) to enable data-driven business decisions and identify improvement opportunities.

Objectives

Key Metrics Needed

- Total customers
- Total revenue
- Daily revenue growth rate
- Daily customer growth rate

Segmentation & Breakdown

- Customer and revenue analysis by age group and city
- Ability to switch between revenue trends and customer trends over time

Filtering Capabilities

- Filter data by sales mode, age group, city, month, and policy ID

Dedicated Analysis Pages

Sales Mode Analysis:

- Total customers and revenue split by sales mode (% breakdown)
- Month-over-month sales mode trends

Age Group Analysis:

- Age group impact on expected settlement, sales mode preference, and policy preference
- Enable demographic-based business decisions

Preferred Policy

Policy Id POL3309HEL is the most preferred policy among customers

Suggestions

Some key
recommendations
based on the insights
from the dashboard

✓ Revenue Optimizations

Focus on the most revenue generating city, sales mode, age group, policy and implement appropriate strategies to maximize revenue.

✓ Target City

Focus on the highest revenue generating city i.e. Delhi NCR with appropriate customer retention strategies, while focusing on cities like Indore, Chennai to improve revenue and maximize customers.

✓ Target Age Group

The company should introduce policies or loyalty schemes attracting more customers especially in the age group 31-40.

✓ March Strategy

March is the month for peak revenue and customer increase. Creating strategies for maintaining customer base and also focusing on other months during the year to increase revenue & customers.

✓ Offline Agent

Since Offline Agent is bringing highest revenue & is also preferred mostly by the customers. Focusing this sales mode by hiring more agent during peak demand.

✓ Preferred Policy

Policy Id POL3309HEL is the most preferred policy among customers. So based on this introducing suitable schemes or programs attracting customers should be conducted. Also focusing on other policies like POL4321HEL & POL4331HEL by maximizing more customers.

CONCLUSION

Shield Insurance demonstrates strong business momentum with consistent month-over-month growth in both revenue and customer acquisition, supported by positive daily growth rates across both metrics. Analysis reveals three key strategic opportunities: geographic concentration in Delhi NCR as the highest-performing market, demographic focus on the 31-40 age group representing the largest customer segment, and channel optimization through offline agents as the preferred sales mode.

To capitalize on these insights, Shield Insurance should prioritize targeted marketing and resource allocation in Delhi NCR, develop age-specific offerings for the 31-40 demographic, consider expanding the offline agent network to meet demand, and leverage the strong performance of policy POL3309HEL for both customer acquisition and retention strategies. Implementing these data-driven recommendations will position Shield Insurance to maximize revenue growth and accelerate customer base expansion.
